PROFESSIONAL EXPERIENCE

Technical Content Producer | Pluralsight *Remote | May 2025 – Present*

- Review and refine tutorials, how-to labs, and code-led instructions across 90+ published courses in software development, IT, AI, and cloud, partnering with authors and stakeholders to ensure accuracy, clarity, and consistency.
- Review AI-generated software-development labs for accuracy, giving structured feedback to improve output quality, and publish reviewed labs as part of the team's AI-assisted authoring workflow.
- Validate guided and challenge-based hands-on cloud labs across AWS, Azure, and GCP; reproduce technical issues, troubleshoot learner support tickets, and verify platform updates to improve content quality and usability.
- Edit Markdown instructions, lab configurations, and cloud templates (AWS CloudFormation, Azure, and GCP), ensuring technical accuracy and adherence to internal standards and the Google Developer Documentation Style Guide.
- Use learner feedback and performance metrics to identify content improvements, prioritize revisions, and provide actionable feedback to authors.
- Coordinate content reviews, approvals, deadlines, and ongoing maintenance while leading a unified onboarding templates project and maintaining supporting process documentation.

Technical Writer | Freelance *Remote | Dec 2024 – May 2025*

- Developed and maintained technical documentation, user guides, and standard operating procedures to improve process consistency and usability.
- Collaborated with product managers, SMEs, and internal teams to validate technical accuracy and maintain consistent documentation.
- Organized and maintained documentation across Confluence, GitBook, GitHub, Notion, and Google Workspace.

Technical Account Manager | Proxify *Remote | Oct 2024 – Dec 2024*

- Managed a pipeline of 50+ inbound opportunities, identifying client needs and matching them with developers and technologies suited to project requirements.
- Coordinated client and technical stakeholder conversations to align resource recommendations with delivery needs.

Solution Engineer | Whatfix *Remote | Jun 2023 – Oct 2024*

- Led implementations for 30+ enterprise customers across Salesforce, Duck Creek, Guidewire, Workday, and NetDocuments; internally also served as the Technical Account Manager for large enterprise accounts, with instructional design responsibilities.
- Implemented and tested 50+ JavaScript and API customizations, validating integrations with Postman and IDEs to help reduce post-implementation issues.
- Documented 30+ customer use cases, requirements, and implemented solutions to support knowledge sharing and team consistency.
- Delivered product enablement and resolved technical inquiries for 10+ enterprise clients in banking, financial services, and insurance.
- Collaborated with instructional designers and customers to develop onboarding content and interactive step-by-step guides that helped users navigate digital workflows.

Solution Consultant | Kinaxis *Remote | Feb 2022 – Feb 2023*

- Configured, tested, and deployed user stories supporting a $35M supply-chain network, helping streamline implementation and day-to-day processes.
- Trained 50+ clients on the Kinaxis RapidResponse platform, earning 100% satisfaction based on customer feedback.

Digital Learning Consultant | Kinaxis *Remote | Apr 2021 – Jan 2022*

- Worked with hundreds of customers to understand learning goals and develop learning solutions aligned with industry needs.
