PROFESSIONAL SUMMARY

Technical writer and editor with 5 years creating and testing hands-on labs, developer documentation, and onboarding content. At Pluralsight, I review and test labs across AWS, Azure, and GCP, and have helped publish 90+ courses and labs. Comfortable in code (Java bootcamp, Bash, PowerShell, REST APIs) and docs-as-code workflows, so every step I publish has been run first.

CORE SKILLS

Content: Technical writing and editing, hands-on lab development, API documentation, SOPs and user guides, content audits, style guides (Google Developer Documentation Style Guide)

Technical: AWS, Azure, GCP, Terraform, CloudFormation, Bash, PowerShell, REST APIs, Postman, JSON, JavaScript, HTML/CSS

Tools: Git and GitHub, Markdown, docs-as-code (Jekyll), Confluence, GitBook, Jira

PROFESSIONAL EXPERIENCE

Technical Content Producer | Pluralsight *Remote | May 2025 – Present*

- Led a project to standardize author onboarding across 4 lab types, creating message templates, review checklists, and a publication workflow now built into every TCP's process and used to onboard **700+** authors.
- Reviewed **22+** AI-generated software-development labs, flagging an average of 7 issues per lab, such as uncompletable tasks and failing validation, before publication. Wrote feedback the team used to improve the generation prompts.
- Review, test, and edit hands-on labs and courses in software development, IT, AI, and cloud; have helped publish **90+**.
- Test guided and challenge labs on AWS, Azure, and GCP: reproduce reported issues, resolve **100+** learner support tickets, and verify platform updates.
- Edit Markdown instructions, lab configurations, and cloud templates (CloudFormation, Azure, GCP) for technical accuracy and the Google Developer Documentation Style Guide.
- Maintain published labs from learner feedback, updating code and instructions to sustain a **92%** quality rating and cut support tickets on maintained labs by **15%**.

Technical Writer | Freelance *Remote | Dec 2024 – May 2025*

- Wrote **15+** SOPs, user guides, and help articles for 3 small businesses, including a lead-outreach SOP that took a real estate sales team from batch texting to CRM handoff.
- Reorganized and rewrote existing documentation in Confluence, GitBook, Notion, and Google Workspace for faster team onboarding.
- Validated technical accuracy with product managers and subject matter experts before publishing.

Solution Engineer | Whatfix *Remote | Jun 2023 – Oct 2024*

- Documented **30+** customer use cases, requirements, and implemented solutions, shared with customers before and after sale so sales, onboarding, and support worked from one source.
- Implemented and tested **50+** JavaScript and API customizations, validated them in Postman, and documented each for other solution engineers to reuse.
- Designed audience-based display for **200+** in-product help pieces (flows and beacons) so each role saw only relevant guidance, shortening onboarding for customer representatives by **25%** and reducing support tickets.
- Led implementations for **30+** enterprise customers on Salesforce, Duck Creek, Guidewire, Workday, and NetDocuments, including **10+** in banking, fintech, and insurance. Also served as Technical Account Manager for large accounts.
- Built onboarding content and interactive step-by-step guides with instructional designers and customers.

Solution Consultant | Kinaxis *Remote | Feb 2022 – Feb 2023*

- Configured and tested solutions from user stories for a **$35M** supply-chain network.
- Trained **50+** clients on the Kinaxis RapidResponse platform, earning **100%** satisfaction in customer feedback.

Digital Learning Consultant | Kinaxis *Remote | Apr 2021 – Jan 2022*

- Built learning paths and training plans for **100+** customers, matching courses to each customer's goals and industry.

PROJECT

Technical writing portfolio: Built a docs-as-code portfolio site with Markdown, Git, Jekyll, and GitHub Pages, with writing samples, an accessibility pass in light and dark mode, and a full commit history.

EDUCATION

B.S., Business Analytics and Information Systems | University of South Florida
Full-Stack Java Bootcamp (700+ hours) | Tech Elevator 2023
Web Development Bootcamp (120+ hours) | The App Brewery 2023
